

DYEING 5/8" Vanilla Flower Trim
www.remarkablycreated.com

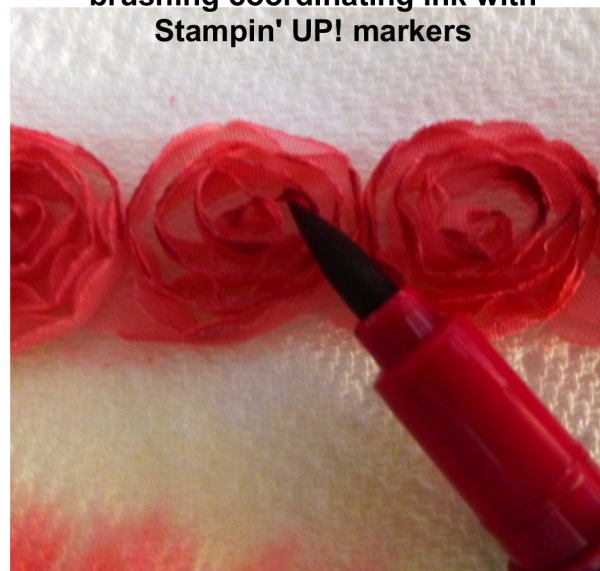

Add drops of reinkers to dish filled with water - you can test color darkness by dropping water on paper towel

The longer you soak the flowers the darker they will get. Remove and dry on paper towels

Add depth and dimensions to flowers by brushing coordinating ink with Stampin' UP! markers

Add a little shine with spray made from frost white shimmer paint & alcohol

You can add color without dyeing by simply "brushing" color on With Stampin' UP! markers

Experiment with colors for dyeing and experiment with colors for adding depth & dimension - same color, contrasting color, a color a shade darker.. there is no right way or wrong way and with Stampin'UP!'s coordinated color families and product line your altered flowers will top off any project.

**Happy Creating
